

Medical intelligence for better care

VIDAL DRUG INFO

VIDAL CONSULT is the VIDAL decision-support application designed for hospital and private practitioners. It includes complete reference information on drugs available on the market, helps control prescription safety, and allows for management and optimisation of the hospital formulary. Backed by 100 years of experience in the field of drug information, VIDAL Consult helps improve the efficiency of patient management by providing healthcare professionals with access to trusted medical and scientific information on pharmaceutical products.

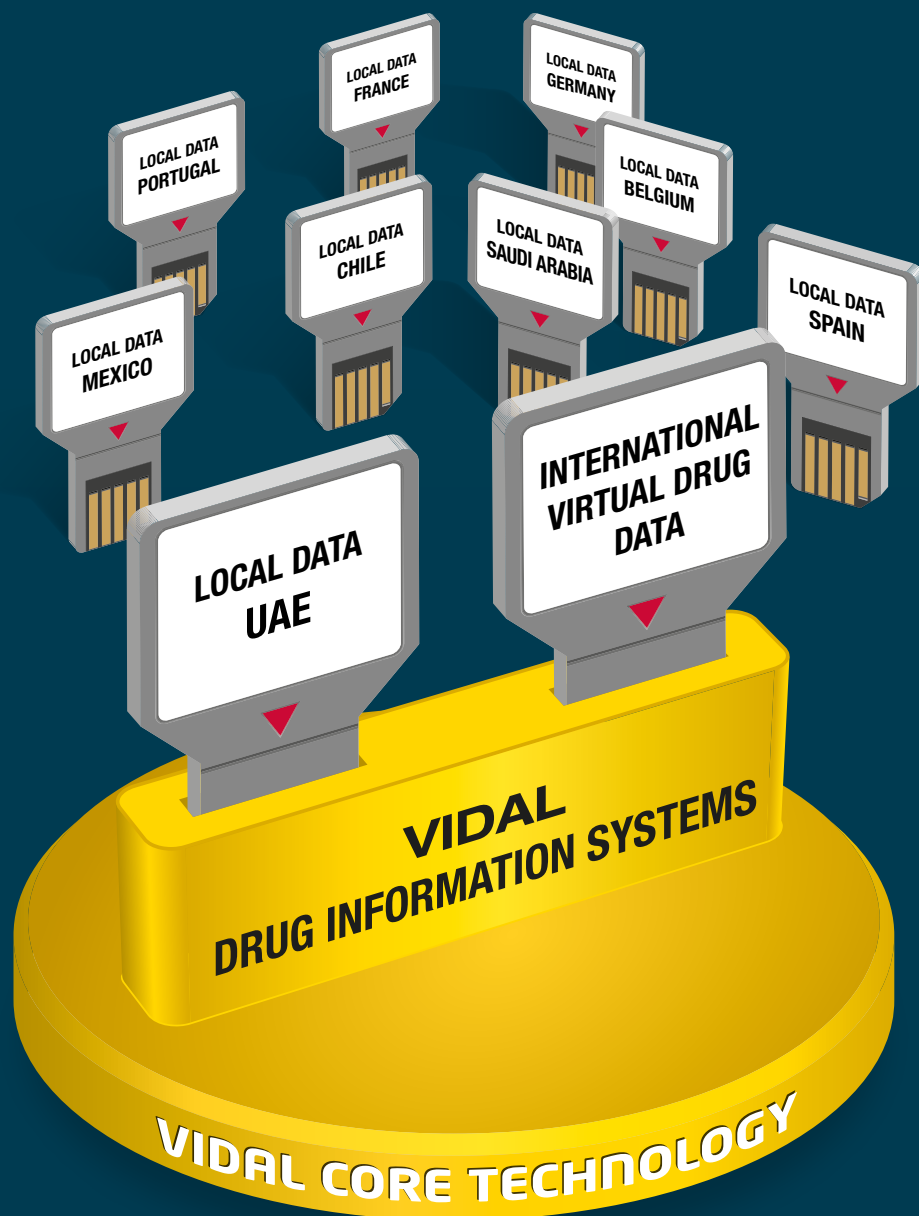

VIDAL CONSULT key functionalities

- 1 Access to reference clinical information on drugs
- 2 Access to foreign equivalent products (International Brands)
- 3 Prescription safety checking
(based on VIDAL Core's Decision Support Modules)
- 4 Hospital formulary management
- 5 Drug data annotation

RMATION SYSTEMS

VIDAL CORE TECHNOLOGY

VIDAL Drug Information Systems are underpinned by an international repository of Virtual Medicinal Products (VMP) linked to a broad semantic network detailing the usage, clinical effects, and potential risks for each drug. The information is highly structured and constantly updated by our team of pharmacists. In each concerned country, VIDAL closely monitors the formularies issued by relative official health authorities and adapts its information to the local needs in order to provide healthcare professionals with a reliable source of information on the drugs that are accessible in their everyday practice.

Reference Drug

VIDAL CONSULT provides rapid access to reference clinical information on drugs, curated by a team of healthcare experts (pharmacists, physicians, pharmacologists) and based on national and international reference sources. With its powerful search engine processing all of these data, **VIDAL CONSULT** rapidly identifies specific search terms in 5 categories: Brand name, Active ingredient, Generic, Indication and ATC class.

By entering a specific key word, view the results of the search in the different categories.

Easily browse the list of results in each category.

The screenshot shows the VIDAL CONSULT search results for 'FLUCONAZOLE'. The search bar at the top contains 'FLUCONAZOLE'. Below the search bar, the results are categorized into five sections: Active ingredients (1 result), Branded products (2 results), Generics (5 results), Indications (0 results), and ATC Classification (11 results). The 'Active ingredients' section shows 'Fluconazole'. The 'Branded products' section shows 'FLUCONAZOLE BAXTER solution for infusion 2 mg/ml' and 'FLUCONAZOLE BEDFORD solution for infusion 200 mg/100 ml'. The 'Generics' section shows 'fluconazole * 100 mg ; oral use ; capsule, hard', 'fluconazole * 150 mg ; oral use ; capsule, hard', 'fluconazole * 2 mg/ml ; parenteral use ; solution for infusion', 'fluconazole * 50 mg ; oral use ; capsule, hard', and 'fluconazole * 50 mg/5 ml ; oral use ; powder for oral suspension'.

The screenshot shows the VIDAL CONSULT search engine with the search bar containing 'FLUCO'. Below the search bar, a list of suggestions is displayed, including 'FLUCONAZOLE BAXTER solution for infusion 2 mg/ml', 'FLUCONAZOLE BEDFORD solution for infusion 200 mg/100 ml', 'FLUCORAL capsule, hard 150 mg', 'FLUCONAZOLE', 'fluconazole * 100 mg ; oral use ; capsule, hard', 'fluconazole * 150 mg ; oral use ; capsule, hard', and 'fluconazole * 2 mg/ml ; parenteral use ; solution for infusion'. A blue arrow points from the 'FLUCORAL capsule, hard 150 mg' suggestion to the detailed product page.

Information can be accessed directly via the automatic completion tool of the search engine (analysis of the first letters of a key word).

The screenshot shows the detailed product page for 'FLUCORAL capsule, hard 150 mg'. The page includes a navigation menu on the left with sections like Indications, Dosage & administration, Warnings, Treatment monitoring, Interactions, Contraindications, Precautions, Pregnancy & lactation, Specific risks, Food interactions, and Adverse effects. The main content area is divided into two columns. The left column contains 'Overview' and 'Drug details' (Active ingredients: fluconazole, Strength: 150 mg, Form: capsule, hard, Route: oral use). The right column contains 'ATC Class' (J02AC01, FLUCONAZOLE), 'Drug equivalents' (same form, route and active ingredients), and 'Reference documentation' (Printable monograph for: fluconazole * 150 mg ; oral use ; capsule, hard). A table on the right shows 'Reproductive health (risk)' and 'Vigilance' data.

Drug Information

As a result of VIDAL's expertise in structured and synthetic drug information, **VIDAL CONSULT** allows you to quickly access consistent medical and scientific information related to a product or ingredient via its innovative data sheets.

Prescription checker

VIDAL CONSULT allows you to check the safety of a prescription by detecting any intrinsic problems between drugs (Drug-Drug alerts) as well as risks related to the patient's pathophysiological profile (Drug-Patient alerts).

This function is based on the powerful Decision Support Modules provided by the **VIDAL CORE TECHNOLOGY**, alerting the user about drug interactions, redundant ingredients, contraindications, precautions for use and allergies related to the prescription context.

Add a drug to your virtual prescription.

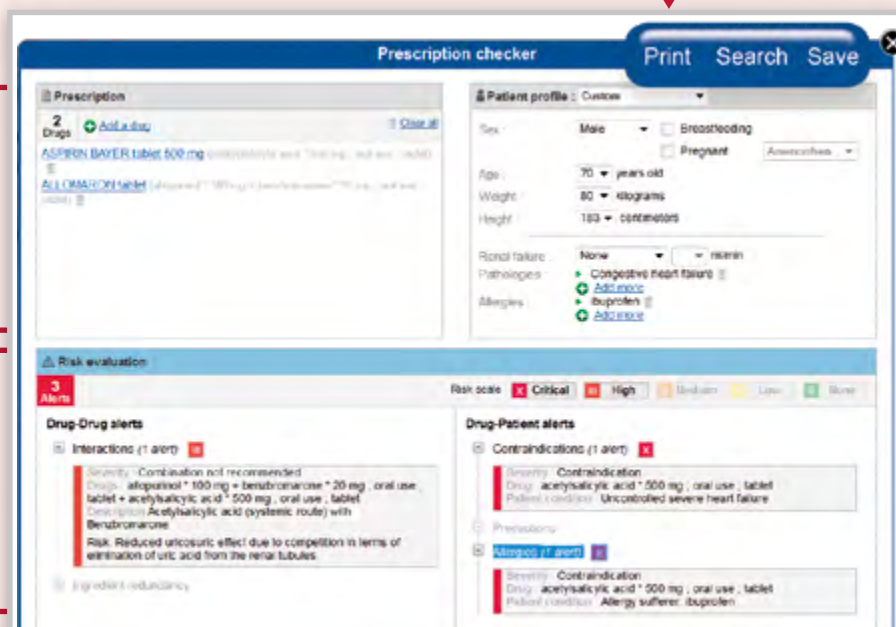

Check at a glance for the level of risk of a prescription for a given patient.

Access a control panel detailing the issues that have been detected.

Save or print the prescription context and the alert results.

View the virtual prescription and add drugs.

Identify the nature of the risk and the level of severity of the interaction.

Fill in the patient information according to the available pathophysiological criteria.

View alerts related to the patient's profile.

Formulary

and content management

With its integrated hospital formulary management tool, **VIDAL CONSULT** allows all hospital practitioners to easily access all the drug references available on-site. Management of the formulary is optimized for the pharmacist who can intervene at any time on a drug item (creation, deletion, modification). Drug data sheets and ingredient data sheets can also be personalized in order to add specific information (warnings, best practice procedures, links to in-house resources, etc.).

Products in the hospital formulary are identified by a specific logo and are automatically positioned at the top of the search results list.

Customized information is visible in the drug and ingredient data sheets.

Use specific tools to manage and personalize the data sheets available in the hospital formulary by adding complementary information.

Content

VIDAL drug databases and Clinical Decision Support Modules are elaborated from official drug lists and internationally recognized official sources (EMA, FDA, ANSM,...) by a multinational team of health experts based in Europe (pharmacists, pharmacologists, physicians, scientists, database architects, medical informatics specialists).

VIDAL Drug Information Systems are used in numerous healthcare facilities in Europe, Latin America, the Middle-East and Africa, and are present in over 95% of hospitals in France. As the European leader in the field of drug information, VIDAL is also involved in many international health projects such as EPSOS (European Patients - Smart Open Services), PSIP (Patient Safety through Intelligent Procedures in medication) and UNICOM (Up-scaling the global univocal identification of medicines).

About VIDAL Group:

The activity of VIDAL Group is entirely devoted to information on medication and health products, clinical decision support and prescription safety solutions, with a goal to participate in the continuous improvement of medical practice. VIDAL disseminates its data and services through all types of digital platforms used by healthcare professionals (medical software solutions, web, mobile).

Relying on a multilingual knowledge base, with teams in France, Germany and Spain, VIDAL Group is a major player in the field of medical information systems, providing its solutions in 30 countries. In France, its solutions are used by more than 450,000 healthcare professionals, including 180,000 physicians; VIDAL was selected as one of the first 10 laureates of the national Health Data Hub call for projects and contributes to many innovative projects aiming to mitigate risks related to the use of health products.

Since 2016, VIDAL Group is part of the M3 group, a global player in digital health and leader in Asia and Japan. M3 is listed on the Tokyo Stock Exchange (2413.T).
